

New Product Catalogue Shows Diversity of

Henry, AC&R and Chil-Con are well known international brand names of long standing in the refrigeration and air conditioning industry.

THE Henry Valve Company commenced production in Chicago in 1914 and in 1970, acquired AC&R Components. Today the combined Henry and AC&R range is manufactured in modern plants in Illinois, USA and Glasgow Scotland. For decades, Henry has maintained its reputation as a leading global manufacturer of flow control products for commercial and industrial refrigeration as well as for air conditioning. Alongside Henry, the AC&R Components brand has acquired the position of a global leader for quality, design and innovation of oil management controls and other compressor protective devices.

Chil-Con, has been in the manufacture of heat transfer products, pressure vessels and water-chillers since the 1950's and continue to manufacture in a modern plant in Brantford, Canada.

HENRY TECHNOLOGIES Inc. has combined the quality standards, technical leadership, service and value for money of 3 leading brand names into one global manufacturer with a foundation of 90 years of experience. Since Hendricks Holdings, a private USA company owned by Ken and Diane Hendricks, acquired ownership of Henry Technologies in 2005, the focus has been to continually improve customers experience in every aspect of service from technical support to delivery of product. The latest Henry product catalogue, with modern layout, illustrates a commitment to the supply of quality products designed to meet international standards and customer expectations.

The user friendly catalogue with illustrations, product specifications, dimensions and selection data will serve as a useful aid for those wanting to select the most suited product for the duty and application.

The extensive product range in the catalogue includes:

- Oil management systems
- Ball Valves
- Helical oil separators
- Check valves
- Optronic oil level regulators
- Pressure relief valves
- Oil reservoirs
- Oil strainers
- Three-way shut off valves
- Pressure switches

- Liquid level switches
- Moisture indicators
- Vibration Eliminators
- Sight glasses

The company is committed to developing products that solve problems or add value in the changing world of refrigeration and air conditioning. As the market landscape shifts, Henry Technologies is ready with answers to new questions.
